ABOUT ME

Full Stack Developer with 2+ years of experience building, deploying and maintaining web applications using .NET Core, React/TypeScript, Node.js, SQL Server and AWS. Experienced in REST APIs, JWT authentication, database optimization, cloud deployment, third-party API integrations and AI-enabled workflows. BSc (Hons) in Information Technology graduate from the University of Moratuwa, with experience mentoring junior developers and delivering production software.

WORK EXPERIENCE

XpressJobs (Pvt) Ltd. | Mar 2024–Present

Full Stack Developer | 2025 Jan - Present

Associate Full Stack Developer | 2024 Mar - 2024 Dec

- Built and maintained full-stack features using .NET Core, React/TypeScript, and SQL Server, including JWT-secured APIs and fully responsive web interfaces.
- Developed and integrated REST APIs with JWT authentication, ensuring secure communication between frontend and backend systems.
- Worked extensively with AWS EC2, S3, DynamoDB, RDS, and Lambda, including implementing AWS-based task scheduling to replace third-party CronJobs.
- Integrated OpenAI API and Meta API to support automated job-posting workflows and contributed to the development of an AI-powered interview scheduling assistant.
- Managed application deployments to AWS EC2 servers, including publishing applications and managing server files using tools such as WinSCP.
- Implemented SEO and technical improvements to enhance website visibility, search engine performance, and overall site structure.
- Mentored junior developers, conducted code reviews, and provided technical guidance to improve code quality and adherence to development best practices.
- Integrated payment gateway systems, gaining practical experience in payment workflows, transaction handling, and security considerations.
- Optimized SQL Server performance using indexes, stored procedures, and query improvements to reduce query execution time and improve system responsiveness.
- Designed and implemented a high-performance job search and filtering system based on location and sector, improving search efficiency and user experience.
- Performed system maintenance, troubleshooting, bug fixes, and performance improvements to enhance overall application stability and reliability.

Technologies: .NET Core, React (TypeScript), .NET MVC, MSSQL, AWS

SOFF Cricket

Software Engineer (Part-Time) | 2023 JUNE - 2024 JAN

- Developed a web-based platform to manage cricket facility bookings, user accounts, and administrative operations.
- Optimized database performance and architecture to ensure system stability and data integrity during high-traffic registration periods.
- Expanded the web application by translating client requirements into new, scalable features to support the organization's growth.
- **Technologies: Angular, JAVA, MongoDB**

Hasthiya IT

Trainee Software Engineer | 2022 JAN - 2022 JUNE

- Developed backend services and administrative features for Fitbets, a mobile betting platform supporting user management, content moderation, video uploads, voting, and betting workflows.
- Developed and maintained backend APIs for Zlive, a mobile live-commerce application with real-time chat and live video streaming, implementing authentication, authorization, and database operations.
- Projects: Fitbets (mobile betting platform) and Zlive (mobile live-commerce platform).
- **Technologies: Node.js (Express.js), React, MySQL**

TECHNICAL SKILLS

Programming Languages - **C#, JavaScript, TypeScript, Java, C**

Web Development - **React , Angular , HTML , CSS**

Backend Development - **.NET Core , ASP.NET MVC , Node.js**

Database - **MYSQL , MSSQL , MongoDB**

Version Control - **Git , Bitbucket**

Web Hosting - **AWS , Heroku**

Project management Tools - **Jira , Worklenz**

ACADEMIC PROJECTS

Lung Disease Prediction System | Final Year Research Project 2023

- Using X-ray images, identified lungs as normal or abnormal for the following diseases: Pleural effusion, Fibrosis, and Tuberculosis.
- Contributed to training and evaluating a machine learning model for chest X-ray image classification by applying image preprocessing techniques, feature extraction, and model optimization to distinguish normal and abnormal lung conditions.
- **Technologies: Python, OpenCV, Feature Extraction**

Sport Management System | Software Project 2020

- Provide an effective and efficient process to keep a proper connection with each other in a team and to give good support for gathering, analyzing, and managing data.
- Contributed to designing and implementing a web-based collaboration system, including system diagrams, database design and maintenance, frontend and backend development, and application hosting.
- **Technologies: Angular, MSSQL, Node.js**

Smart Oil Supplier Machine | Hardware Project 2019

- Provide an effective and efficient process to keep a proper connection with each other in a team and to give good support for gathering, analyzing, and managing data.
- Contributed to designing and implementing a web-based collaboration system, including system diagrams, database design and maintenance, frontend and backend development, and application hosting.
- **Technologies: Angular, MSSQL, Node.js**

EDUCATION

University of Moratuwa | 2018 - 2023

- **B.Sc. (Hons) in Information Technology**

Royal College, Colombo 7 | 2007 - 2012

- **G.C.E. Ordinary Level (2012) - 8 A's and 1 B**

H/Ranna Maha Vidyalaya, Ranna | 2015 - 2017

- **G.C.E. Advanced Level (2017) - Science Stream**
  Biological Science - B, Chemistry - B, Physics - B

ACHIEVEMENTS

- Participated in FIT Code Rush (2020), organized by INTECS, Faculty of Information Technology, University of Moratuwa
- Participated in Hack Moral 3.0 (2021), organized by University of Moratuwa
